SAFETY DEBRIEFING

20 APRIL 2009

1. Mount Bourdon gauges to lab stations. - hoses are tripping hazmat

2. Secure Condensate drain.

3. Clarify heat exchanger pressure. P=Pt

4. Reduce peer evaluations to once per partner. Add specific lab to form. (so we can eval performance on dif. labs)

5. Redesign web page/Blackboard - put reference material under reference link.

6. Talk about referencing when there are two refs from same author (2009a, 2009b).
