CHEMICALS

Marshmallow Easter Bunnies (ALREADY PRESENT AS “MYSTERY SUBSTANCE”)

EQUIPMENT

I. Vacuum Flask
   A. 1L size is best
   B. 500mL size is acceptable
II. Rubber Stopper (SIZE # _____) (to fit top of vacuum flask used above) (1 TOTAL)

PROCEDURE

Clamp the vacuum flask to a ringstand with a round-jaw clamp. The vacuum flask should be placed at the front of the lab (when time for Mystery Substance Experiment) for a demonstration by the Instructor, TA or PA (you!). The demonstration should show what happens to the "mystery substance" in a vacuum. Wait until the END of the experiment before showing students.
