Abstract State Machines 
and High-Level System Design and Analysis

A special issue of the TCS Journal, edited 2004 by Egon Börger,

* Dipartimento di Informatica, Università di Pisa, 
  Via F. Buonarroti 2, I-56127 Pisa, Italy

Key words: Abstract State Machines, High-Level System Design, Mathematical System Analysis, Refinement, Verification, Testing, Coordination, Mobile Networks, C#

1 Contents

- Cyrille Artho, Howard Barringer, Allen Goldberg, Klaus Havelund, Sarfraz Khurshid, Mike Lowry, Corina Pasareanu, Grigore Rosu, Koushik Sen, Willem Visser, Rich Washington: Combining Test Case Generation and Runtime Verification
- Egon Börger, Nicu G. Fruja, Vincenzo Gervasi, Robert F. Stärk: A High-Level Modular Definition of the Semantics of C#
- Uwe Glässer and Qian-Ping Gu: Formal Description and Analysis of a Distributed Location Service for Mobile Ad Hoc Networks
- Yuri Gurevich and Nikolai Tillmann: Partial Updates
- Stanislas Nanchen and Robert F. Stärk: A Logic for Secure Memory Access of Abstract State Machines
- Gruia-Catalin Roman and Jamie Payton: A Principled Exploration of Coordination Models
- Gerhard Schellhorn: ASM Refinement and Generalizations of Forward Simulation in Data Refinement: A Comparison

Preprint submitted to Elsevier Science 20 May 2004
