

## What is on DEREK'S DESK (DSD) Today?

We are now getting in into the meat of my work: The Flood. We live in a Post-Flood World. The Ark made a copy of the Original Creation, the Flood destroyed the Original Creation, and God expanded the canvas for His New Creation. We will see another application of the Creation Function (CF).

Although this DsD will be Part One of a two-part story, this "wetting" aspect of the Flood does give results that we can talk about in an objective manner.

### Another Example of the Common Numerical Themes in the Bible

Last issue I introduced the Pre-Flood (PF) Earth. Today I bring you The Great Flood, which completely destroyed the Original Earth and set the stage for this Blue Planet we thrive on now.

this issue:

## The Flood: Wetting the Earth

Building the Ark: 120 Years or 46 days? **P.1**

The Flood: Accounting for 150 Days **P.2**

OutFront: The Expanded Universe **P.3**

## Building the Ark: 120 Years or 46 Days?

### 120 Years is not consistent:

Gen 5:32: Noah was 500 when he had his sons. 2 Pet.2:5: Noah was a "preacher of righteousness". Gen. 6:3, says that there were 120 years during which God would strive with Man in Noah's time. 1 Pet. 3:20 adds "while the Ark was being prepared". Gen. 6:13: God first gave the instructions to Noah, He references the sons' wives. Gen. 7:11: Noah is 600, and the sons' wives were referenced again, the Flood begins. That is only 100 years and 47 days.

### Ark May Have Taken 40 Days to Build, 6 Days to Fill:

The sons were married adults when Noah received instructions from God, and they began building the Ark right away on the first day of that year. Heb. 11:7 says that Noah "moved with fear". God did not say when the rain would start. If all 8 family members were available builders of the Ark, and each builder put up one 50 X 30 X 1-cubit ark frame a day, including 65 additional frames-worth of wood for walls, the construction would take 46 days. And the Flood followed on the 47th day of that year, Gen 7:11. John 2:20: Note that Herod's temple took 46 years to build.

### Example in Nature, The Butterfly:

We do have an example in Nature which demonstrates the principle of a living organism being in a terrestrial state, encapsulating and going into a reformation period only to finish and emerge into a celestial, higher (flying) state. This is the metamorphosis life cycle of the butterfly.

### The Caterpillar Form vs The Ark:

Check out the picture above. This caterpillar features a very "sectional" construction just like the Ark is described in DsD4 where I liken the Ark to a "loaf of bread". Also, how the caterpillar will climb up a tree and attach itself to a branch where it will hang on a tree until it can fly away is a familiar theme. Christ was lifted up and hung on the Cross, died and rose again.

### Ark Built and Filled According to Creation Function

The Ark Frame had the capacity to hold 624 particles. The 6-Day Active Creation goes to Root 616 (DsD1), plus there were 8 family members. Counting, there were 252 wood particles available from Day 6 of the CF. There were 164 pitch particles available--74 from Night 6 and 90 from Day 5. And finally, there were 208 "cargo" particles--72 from Night 6 (total of 146 from Night 6), 54 from Night 5 and 82 from Night 4 to Day 1. These total 624. Watch "The Creation Function" TV show to see this gone through completely.

### Ark Made of Trees:

The passage in Eccl. 11:1-6 is interesting. Read it with Noah in mind hastily building the Ark with 8 family members. It was built daily from what God provided only to be "cast upon the water." Notice the rain reference. And then notice especially how he quickly took the trees as they fell in the new NS direction that the Ark was to be built. Noah was not wasting any time.

## The Wet Diagram

The Creation Function creates a "map" of the Word of God. I call this new map "The Diagram".

The "Wet Ark" Diagram shown is simplified and shown in the East-West dimension only to show what is important to understand to this point.

The Sword is also the time axis, but not time as we understand. This is PERMANENT time and may be thought of as territory. To God, time is territory. The Sword divides time according to the CF and gives occupancy for the increase of the East-West turning of Creation as Days go by. In this wetting diagram, the Sword becomes the N-S dimension. The Sword takes the 7<sup>th</sup> Day and divides it, multiplying it into N-S 40 Days of Living Water to keep the Ark alive.

The Separation Grid (SepGrid) also grows as it's spiral turns. It was the SepGrid that became the Garden of Eden. When something is planted on the Sep Grid, it grows in a spiral fashion, just like we see everything grow today. The SepGrid also divides (like a cell) and multiplies into the new SCOPE occupancies developed along the E-W axis. Here, the SepGrid is divided by the Sword in a destructive manner according to Gen. 7:22,23. The existing 7 Days of the Original Creation not aboard the Ark is cut up and multiplied into 47 Days.

The E-W begins to develop also during the wetting of the ark, but does not "come into its own" until the drying process is finished. Here we see God's perspective of the Flood: Using the 150 Days, He added 40 Days to N-S, 47 Days to SepGrid, leaving 63 Days for the E-W (Spatial) dimension.

## THE FLOOD: ACCOUNTING FOR 150 DAYS

A critical read of the Flood Account in Genesis reveals that contained in the narration were two points of view: Noah's 40 Days and God's 150 Days.

### The 40 Days of Noah's Flood (NS):

Many question if the entire "wetting" portion of the Flood was "40 Days" or 150 Days. I have discovered using the Creation Function, one can account for both perspectives. The main idea here is that rain and flooding acted in each of the 3 Diagrammed dimensions.

The Ark was built in the new N-S dimension aka The Sword. The rains that acted upon this dimension of the Ark came from above. This is the 40 Days and Nights we read about. Forty Days and Nights of permanent time were added to the World in the N-S dimension. This raised the Ark from Day 7 of the Original Creation to Day 47 of what is to become the World we experience today. In this dimension, the Ark "walked" upon the waters, much like Christ did the Sea of Galilee.

### 47 Days of Dry Land Destruction in the Separation Grid

Since the Ark was loaded with a Good copy of the SepGrid according to the Word of God, all that was left was that which did not conform to the Word, i.e. everything not on the Ark. Gen. 7:22,23 recounts what happened to this portion of Creation left on the dry land. As explained in DsD6, normally the Sword divides the SepGrid and perpetuates life. But now, with only evil remaining on the SepGrid, the division by the Sword is Death. Using the CF, the 7-Days of the Original Creation were literally divided up by the Sword for 47 Days from the bottom up. These destructive waters were from the fountains below.

### 63 Days Left for spatial E-W:

The Flood is changing the physical structure of the World. Gen. 7:18: The Ark "went upon the face the waters". We take this for granted, but God is saying that the way things move has profoundly changed, now that the E-W has been expanded 63 Days according to the CF.

### The 63 Days Accounting:

I can show that the 63 Days come from two calculations. One is that we have used up 87 days of the 150 Days God is telling us about, leaving 63 for the E-W. Also, the Bible give us another odd numerical clue that the water was 15 cubits above the highest portion of the earth. We know the SepGrid (Dry Land) leaves off at Day 47, so adding the 15 to that gives 62 Days. And since the Ark needs a little draft to not run aground, we put the E-W waters level at Day 63.

### The Ark Was Weighed:

Now, we will apply Archimedes' Principle which says that the Ark will spatially displace the amount of water equal to its weight. We see that the water comes half-way up the Ark, that yields an interesting result. The Ark was 450,000 cubital elements. Half of that is 225,000. We said that 365 Ark frames' worth of material went into the Ark, so dividing 225,000 by 365 gives 616 cubital elements per frame, which equals the CF amount of the 6-Days Creation. And since weight is related to gravity, we can say that God established Gravity here.

# OutFront: The Expanded Universe

## Huge, but not Infinite:

With 150 CF Days, we have 150 orders of natural magnitude\* for the potential largeness of the cosmos. Using ROOT 1 as Planck's length, expanded 150 Days is  $6 * 10^{30}$  meters, or trillions of light years. However, this is misleading because of how God adds to a decentralized Universe in the same fashion as described in the Feeding of the 5000, during which He takes what is given to Him and divides it into more. The World is not infinite, but tends towards infinity as He divides the portion of the World which conforms to His Word and adds it to His Creation.

The 150 Days that the waters "prevailed" upon the Earth includes a 110 Day space-time portion from 63 E-W and 47 N-S Days, respectively. I can quantify the 110 Days with the following: The Human Genome contains 3.2 Billion base atomic pairs, each with a bond length of approximately 0.3 nm. This gives a genome of 1-meter length. Also given that each human being has 20 Trillion of these, one in each cell, that gives 20 Trillion Meters. And Using ROOT 1 as Planck's length, expanded 110 orders\* is 24 trillion meters, the approximate diameter of the Solar system, and is also 1 Light Day.

Messier 81 Galaxy

The Big Bang is taught to be the explanation of Origins, and the source of the "Expanding Universe". My research suggests that the World was expanded during this "Wetting" portion of the Flood--During which a quantifiable amount of Flood Water material is added to our World.

## No Center:

Current cosmological research cites that the Universe has no spatial center. The way that the Diagram works with its spiral growth and its dimensions in Time, Space and Mass agrees with this. The Universe has a center in permanent time. Individual particles do also--but in addition they have been given a center in space to occupy. This is a consequence of the Flood after the drying phase, which will be the subject of DsD8.

## Appearance of Age:

The amount of permanent time attached to the World increases from 7 Days to 47 Days. Increasing the amount of time by 40 orders of natural magnitude\* equates to adding a potential of trillions of years. This will be explained further in DsD8.

## Unification:

The challenge of Modern Cosmology and Physics is a Grand Unification Theory. We haven't been able to unite the hugeness of the cosmos with the smallness of elementary particles. Tying gravity into the Standard Model is the challenge. In New Creation Research, the Ark comes from a dense, energetic PF World, and it is weighed before becoming the conduit between the PF World and that of today. Be sure to follow up with the next DsD8 which will give more objective details on this subject.

## EYE ON IT

### A Solution for the Distant Starlight Problem Using Creation Time Coordinates

Tenev, T.G., J. Baumgardner, and M.F. Horstemeyer

2018 International Conference on Creationism

The International Conference on Creationism (ICC) is a meeting of the top creationists every 4 years. The presentation cited above was given during the 2018 conference. As shown in the Minkowski diagram above, Creation Days and the expansion is shown in the spacetime direction (their "ct", my "N-S").

### Derek's Picks

#### The Creation Function

Produced by Revolution Against Evolution (RAE). Doug Sharp of RAE interviewed me about my integration of the Ark with the Pre-Flood Earth, based upon the 7-Day Creation. This video has been recommended before, but I do so again because I go through a chart showing how the Ark Frame perfectly holds the 7-Day Creation.

## This Issue's Q&A in New Creation Research

### Q1: I still don't understand the Ark building time. The 120 years seems reasonable...

A: The Bible simply does not say directly how long it took. The combination of the verses cited in "120 Years is Not Consistent" leaves a lot of ambiguity. And the first mention of Noah's age of 500 and the final mention of Noah's age of 600 when the Flood began is not 120 years. The main question is "was the ark being prepared for the entire 120 years of God's striving with Man as Noah preached." Noah may have been preaching when he was 480. That is why he found favor in the eyes of God. Compare the Pre-Flood narrative of Gen. 5:28 through Gen 7:11 with the destruction of Sodom and Gomorrah in Gen 18-19. It follows a similar pattern as that of the Flood: First, God continually hears about the evil in Sodom, but does little about it, "striving with it". For Sodom, many years pass from Gen 13 - 19 when an unmarried Lot chooses to live in Sodom until God investigates Sodom for Himself in Gen 18:21. Once that happens, things happen fast. Lot is married, angels are sent down, they literally pull Lot and family into the safety of the house "shutting the door." The next morning, Lot and family (mostly) escape to the mountain, and the evil cities are "rained upon" with fire and brimstone. Therefore, God is longsuffering, but when He investigates for Himself and makes His conclusions known, He acts within a matter of days, including providence for the righteous. In Noah's case, God drew His conclusion in Gen. 6:13 when Noah's sons were grown and married. And God did not tell Noah when the Flood was coming. And Noah and family began building the Ark the first day of his year 600, finishing on Day 46. The number 46 being also the number of years to build Herod's Temple.

## Who is Derek?

Derek Marshall of East Lansing, MI is an electrical engineer who holds a bachelor's degree in Physics from Michigan State University. An inventor and former Marine, Derek discovered the Creation Function in 2005 and has applied it to many of the Bible's more difficult topics as well as questions in Modern Physics and Chemistry.

### \*Order of Natural Magnitude:

I used this term without explaining it. An "order of natural magnitude" is an exponential change, base e, plus or minus one in the value or a quantity. It is another way of saying "one rotation of the Creation Function Logarithmic Spiral" or multiplying a value one time by 2.718. Since each rotation of the CF approximates e, the CF is again found to be in harmony with Nature.
