

- If you wish to propose a minisymposium (MS) that you are willing to organize, a mechanism for such proposals will be available on the conference web page. These, and all abstracts for contributed talks, will be reviewed by the program committee. All MS and contributed talks will be 20 minutes in length with five additional minutes for questions.
- The conference venues will be downtown Winnipeg with plenary talks at the Metropolitan Entertainment Centre on 281 Donald Street and all other talks at the University of Winnipeg.
- Special events will include: a welcoming reception (Monday), a public lecture reception (Wednesday), a networking luncheon for those identifying as women and a networking dinner for students and post-doctoral fellows.
- Students and post-doctoral fellows may apply for funding. Please see the conference webpage for details.
- Special conference rates have been arranged for a limited number of rooms at several hotels. Please see the conference webpage for details. Conference participants are encouraged to reserve their accommodations early since June is a busy month for conferences in Winnipeg. Please be **vigilant** if it comes to providing personal information. It seems that **scammers** are looking for conference websites and producing fairly believable email appeals for credit card and personal information.
