By Dr. Jinshan Tang

Dear all,

We always have issue to sign the transmittal form by digital signature.
The way you can do is as follows:

1. Convert the secured PDF to .xps format. You can use printing function in your computer to convert.
2. Convert the xps format back to PDF format.
3. Sign the new PDF you just converted from xps.

If you have better ways, just let me know.
